## Technical Skills

---

- HTML
- CSS
- JavaScript
- GitBash
- Visual Studio Code
- GitHub
- Google Drive

## Projects

---

**Code Refactor:** This was a project which involved dissecting code and finding all the errors located within it. Click on the link below and you will see that the site functions perfectly now.

Languages Used: HTML.

<https://namideo.github.io/Horiseon-code-refactor/>

**Password Generator:** An application used to generate a password based on set criteria. A series of prompts will ask for password criteria and then a random password will be generated based on the selections.

Languages Used: HTML, CSS.

**Quiz Game:** A simple quiz game set with a timer. You are given a minute to answer a series of questions. For each wrong answer the timer will deduct ten seconds. At the end you will be presented with your score.

Languages Used: HTML, CSS, JavaScript.
